

SLV Play LED lamp

QPAR51, controllable RGBW

It's true that there are some things more exciting than a lamp. But, as it often is, the difference is in the details. To be precise, the difference lies in four letters: RGBW – in this case, this means: 16 million colours. The PLAY GU10 RGBW LED lamp from SLV creates a unique lighting experience with its LED technology which begins at start-up, continues with the flexible usage options and continues through the entire service life of the product like a red thread. Or is the red thread actually green? Or yellow? You can decide. You want to know a bit more? Gladly. The SLV PLAY GU10 RGBW LED lamp is based on connector type GU10 and is not only suitable for use in living areas, but also in connection with use in business rooms. Among other things, the long service life of 25,000 hours is impressive, plus the fact that the light is available to the user within less than 0.5 seconds of switching on. The start-up of this energy-efficient model is just as completely problem-free thanks to the high degree of user convenience. Other advantages can be seen in conjunction with integration in an existing Smart Home System. If you use Amazon Alexa or the Google Assistant, for example, you can also conveniently operate the dimmable light with your voice. Alternatively, the light can also be controlled using a light switch, an app or the separately available remote control, of course. The modernity and the wide variety of usage options of this model are all highlighted when you look at the data sheet. For example, not only does the user benefit from a luminous intensity of a pleasant 460 Lumen, but also from a weighted internal consumption of 6.6 Watts and an individually adjustable colour temperature of between 2,200 and 6,500 Kelvin as well as 16 million light colours (RGBW). A hub, a bridge or a gateway are not required. A WLAN signal is required for full usability. You can look forward to your product with the customary SLV quality!

TECHNICAL DATA

Item no.	1002524
Socket	GU10
Lamp type	LED GU10 51mm
IP Code	IP 20
Dimmable	Yes
Dimming technology	Dim-to-Warm
Nominal voltage	220-240V ~50/60Hz V
Weighted energy consumption	7 kWh/1000h
Electrical power factor	0.51
Wattage	6.6 W
Starting time	1 s
Start time	0.5 s
Minimum ambient temperature	-20 °C
Maximum ambient temperature	35 °C
Lumen	360 lm
Colour temperature	2200-6700 Kelvin
Beam angle	50 °
Color	white
CRI	80
Binning	6 SDCM
Service life	25000 h
Switching cycles	50000

Length	7 cm
Diameter	5 cm
Net weight	0.103 kg
Gross weight	0.148 kg

Accessories

1002516	SLV Play remote control
