

SIMA SENSOR

Indoor LED wall and ceiling-mounted light 3000K square

This allows you to opt for sustainable lighting indoors too: Sima is one of the SLV lights that is partly made using recycled plastics (PCR). It is also a shining example of how quality and high durability can be combined in the most environmentally friendly way possible. The white wall and ceiling surface-mounted light with its solid and flat construction, high colour rendering index (CRI>90) and dimmable warm-white light (3000K) has a strong look, which can be sustainably used in both the private and commercial sector, especially in entrance areas, corridors and basements. And let's not forget the LED sensor, which reliably detects every movement. The light duration and sensitivity can be adjusted individually. The spacer makes it also suitable for cable surface mounting.
