

PARA CONE GL GU10

black / transparent 1-phase spot

The conically shaped reflector of the PARA CONE GL GU10 provides a particularly warm lighting effect. The family can be individually combined into a cloud of light with a wide range of colours and sizes. The 1-phase system light is installed conventionally on the busbar system, which makes it flexibly positionable as well as rotatable and pivoting. And last but not least, the housing made of aluminium and glass impresses with its robust quality. Experience PARA CONE in action and convince yourself of a successful lighting experience.
