

D-RING M

wall light, PHASE, 2700/3000K, PHASE, IP65, white

The new D-RING family elegantly picks up on the trend towards organic shapes. The dimmable indirect warm white light (2700K / 3000K), which can be adjusted via a CCT switch, discreetly and glare-free sets the scene for the facades. The two different diameters offer plenty of creative scope. Thanks to the special surface treatment, it can also be used near the coast.
