

## SLV CONNECT DIMMER-STECKDOSE

SLVconnect® makes smart lighting easier than ever – without IT knowledge, but with proven SLV quality. The SLV-connect® DIMMER socket is easy to install and allows you to add luminaires to your smart light project that are powered by a conventional socket – without any modifications. This means that you can also easily control decorative table or floor lamps via app, remote control or schedule – for maximum flexibility in your smart lighting concept.

### TECHNICAL DATA

|                             |                             |
|-----------------------------|-----------------------------|
| Item no.                    | 1010490                     |
| IP Code                     | IP20                        |
| Impact resistance class     | IK 02                       |
| Impact resistance           | 0.2 Joule                   |
| Dimmable                    | Yes                         |
| Dimming technology          | Leading edge, trailing edge |
| Primary nominal voltage     | 220-240V ~50/60 Hz          |
| Safety class                | I                           |
| Safety class                | I                           |
| Minimum ambient temperature | 10 °C                       |
| Maximum ambient temperature | 45 °C                       |
| Color                       | white                       |
| Width                       | 5.5 cm                      |
| Height                      | 5.5 cm                      |
| Depth                       | 3.8 cm                      |
| Net weight                  | 0.08 kg                     |
| Gross weight                | 0.128 kg                    |
